

Assem Ali Mohammed

FRONT-END DEVELOPER

Alexandria, EG | +201025576637 | assemelmasry55@gmail.com | [LinkedIn](#) | [GitHub](#)

Summary

Motivated and detail oriented Front-End React Developer with a strong focus on building clean, responsive, and user-friendly web interfaces. Skilled in problem-solving, critical thinking, and translating design concepts into functional applications using React.js, JavaScript, HTML, and CSS. Known for a strong work ethic, fast learning ability, and a passion for continuous improvement. Experienced in developing personal projects that showcase both technical ability and a commitment to user experience.

Objective

Front-end React developer seeking to leverage strong skills in modern JavaScript, responsive UI design, and React.js to deliver high-quality web applications. Committed to writing clean, maintainable code and continuously improving user experience through performance-optimized and visually engaging interfaces.

Experience

Front-End Developer (Personal Projects) 2025

- Developed several responsive web applications using React.js, JavaScript, HTML5, and CSS3.
- Built a portfolio website showcasing skills and projects using React, Tailwind CSS, and React Router.
- Implemented Git for version control and deployed apps using Netlify and Vercel.
